EURONEXT

Driven by expertise. Empowering people.

About the organization : A Pan – European market infrastructure with a deep corporate culture. A truly diverse multicultural organization with passionate and delivery-focussed people. We operate seven regulated exchanges in Belgium, France, Ireland, Italy, the Netherlands, Norway and Portugal with a single trading technology offering access to all financial instruments across our markets. We also provide custody and settlement services through central securities depositories in Denmark, Italy, Norway and Portugal, and clearing through our CCP in Italy. We operate Europe's leading electronic fixed income trading markets and the largest center for debt and funds listings in the world. Apart from this, we also offer a range of additional value-added services, including technology and managed services, corporate and investor services and post-trade services.

Euronext India, plays a pivotal in providing the technology services. Being industry leaders, we currently partner with Global Asset Management firms and Investment Banks whereby delivering high impact solutions in the CRM, HFT & Algo Trading, regulatory compliance and research commission space. Leveraging years of experience gained through our Commcise business, we service our growing global client base via a shared services model, with a strong team culture based on the Euronext values: Unity, Integrity, Agility, Energy, and Accountability. To understand more about the values and how we are able to deliver consistently, you could watch the podcast of Chirag Khatter and Amrish Ganatra on Harrington Starr TV - https://youtu.be/cY1om2evzQk?si=W_H5CxNO64vf3DET

Role Title: AI Developer
Product Suite: Commcise is an integrated cloud-based Research Valuation, Consumption Tracking, Commission Management and Share-of-Wallet reporting solution built to meet the needs of Investment Managers. Commcise provides clients with an automated Reconciliation, Invoice/Contract Management, Commission Targeting, Broker Voting, Commission Management and Reporting solution (website link).
Location: Bangalore
Working Hours: 1:30 pm to 10:30 pm IST
Years of Experience: 3years

Role Purpose: We are looking for an AI Developer with a strong delivery mindset; someone who combines technical depth with practical execution, takes ownership of outcomes, and thrives in an environment that values innovation, accountability, and continuous improvement.

As an AI Developer, you'll play a crucial role in shaping and delivering our AI-driven strategies, bringing innovation to our business processes. This position is expected to get involved in the end-to-end lifecycle of AI project, right from problem framing to deployment and maintenance in production. We're looking for someone with a positive, entrepreneurial mindset who can collaborate effectively with cross-functional teams to build and maintain AI capabilities into our existing business functionalities.

The role entails:

AI Development:

- Contribute to the ongoing maintenance and enhancement of our Generative AI models and implementations.
- Identify opportunities to use AI to enhance our internal business processes.
- Stay up to date with advancements in AI and machine learning techniques to drive innovation.
- Educate and foster culture on using AI to the colleagues.
- Continuously identify opportunities to innovate, streamline workflows, and improve business outcomes using AI-driven solutions.
- Apply emerging AI techniques pragmatically, balancing experimentation with production readiness.

Python Coding:

- Write efficient, maintainable code for our AI products.
- Write clean, well-documented, and testable code, contributing to long-term platform stability and scalability.
- Proactively identify technical debt and participate in refactoring and quality improvement initiatives.

Platform Delivery:

- Collaborate with Infrastructure team to maintain our AI products deployed in Cloud environment.
- Ensure that our AI capabilities meet our security and legal standard.

Key Accountabilities:

- Develop, maintain and enhance our current Generative AI products and tools deployed in our cloud infrastructure.
- Monitor and evaluate our AI product in production and proactively identify and troubleshoot issues and driving continuous improvement.

- Collaborate with cross-functional teams to understand business objectives and translate them into new AI tools and features.
- Build Generative AI or predictive models, based workflow for various business applications (e.g., Research Pricing, recommendation systems).
- Ensure that our AI solution development and deployment comply with internal security, legal and governance standard.
- Communicate findings and results to both technical and non-technical stakeholders.
- Contribute to building an internal culture of effective and responsible AI usage.
- Demonstrate ownership and accountability for delivering high-quality outcomes aligned with product and business objectives.
- Communicate progress, risks, and outcomes clearly, ensuring transparency and alignment across teams.

Knowledge, Skills and Experience Required:

Essential:

- Minimum of 3 years of hands-on experience in AI/ML development.
- Proficiency in Python with experience developing production-grade AI or ML applications.
- Experience deploying and operating AI workloads in a cloud environment, preferably AWS.
- Familiarity with Git-based workflows and CI/CD pipelines.
- Solid understanding of core AI/ML concepts, including supervised and unsupervised learning.

Desirable:

- Familiarity with Generative AI technologies and frameworks (e.g. OpenAI API, Bedrock)
- Familiarity with Agents and RAG.
- Familiarity with containerisation (e.g. Docker)
- Knowledge of deploying python-based API (e.g. FastAPI)
- Familiarity with front-end UI for Generative-AI based application (e.g. Typescript, streamlit)

Education and Knowledge

- Bachelor's or Master's degree in Computer Science, Statistics, Mathematics, or a related quantitative field

Profile and Skills

- Comfortable in fast-paced, entrepreneurial environment
- Strong communication and teamwork abilities.
- Ability to deliver individually and as well as a part of the team
- Excellent analytical, problem-solving, and critical thinking abilities
